VERTICAL MODULAR
GREEN SYSTEM

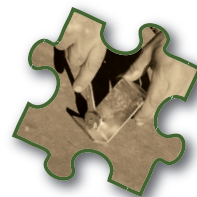

with **PUZLE** it is possible to realize:

- a garden on wall
- a vertical kitchen garden
- a vivid design
- a vertical herbal company logo
- environmental integration of a construction
- a publicity on wall really alternative
- an art installation of natural colours
- and much more ...

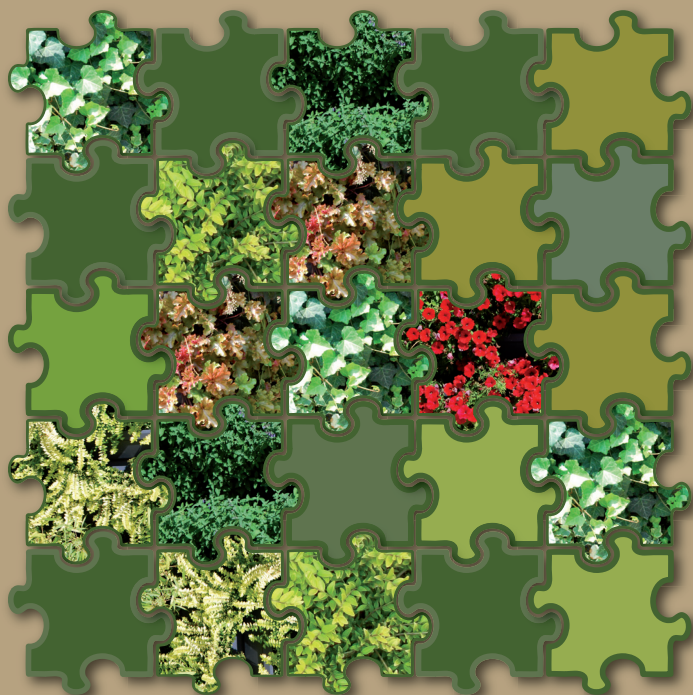

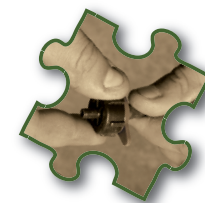

AN EFFICIENT SYSTEM

QUICK INSTALLATION

EASY HANDLING

- **PUZLE** has all advantages of **green walls**: from the enhancement of the aesthetic aspect to the good wall insulation, a reduction of the fine dust, the mitigation of isolation of the building

- **PUZLE** is a **rapid effect system** which doesn't need provided pre-vegetation and it adjusts to the needs of a multiplicity of herbaceous, shrubby, falling and climbing plants

- **PUZLE** has an excellent **cost-performance ratio**

- **PUZLE** is always available **prompt delivery**

- **the modular flower-boxes** are installed on a solid carrying structure of galvanized iron

- it can be installed **on walls**, stand **on the floor**, as self-supporting **dividing wall**

- **the maximum total-load** on the wall is 80Kg/sqm

- **the package is completed** with flower-boxes, carrying-structure and integrated irrigation system (exclusive ECU and fertilizer)

- **the system of integrated irrigation** of a water supply, filled in a falling way, allows to put plants with different water requirements

- **the flower-boxes** are separately uningeable, displaceable, exchangeable, renewable, in a moment

- each plant have 4l of **substrate** enriched with mycorrhiza and slow release fertilizer

- **the wall behind** doesn't get dirty or wet (it is necessary to install a water collector of excess)
